

# Scenario 6: The Battle of the Katzbach 26<sup>th</sup> of August 1813

The Army of the Bober under Marshall MacDonald meets the Army of Silesia under Blucher crossing the Katzbach. Under a storm (that rendered useless the muskets) both armies attempts to destroy the enemy in an encounter battle.

## 6.1 Map: The Katzbach battlefield.

### Map Notes \*:

**6.1.1:** All the buildings have a +2 combat modifier.

**6.1.2.:** The Neisse river can be forded until the town of Schaluppe by infantry units in column or march column at a cost of 3 cm (1 “) of rough terrain. Cavalry units as well as infantry units in line can also ford, but become disordered. Artillery must cross only at bridges. Katzbach R. is unfordable.

**6.1.3:** All open terrain low areas (not on a hill area) are considered mud terrain

**6.1.4:** Due to the rain, all infantry units have a "-7" fire modifier excepting when firing from a building. Maximum visibility is 65 cm. During close combat a roll of "1" indicates a blunder combat. No fires may be started

**6.1.5:** The Allied units are first set-up. One Fr12# from French XI Corp artillery starts deployed with 36/XI. Each division of IIC starts with one Fr6# initially assigned to it from the IIC Corp artillery.

## 6.4. Special rules

**6.4.1 Game Length:** From 10.30 to 20.30 h (21 turns). The French are the first side. 20,00 and 20,30 turns are night turns.

**6.4.2. Weather** Due to the rain, all infantry units have a "-7" fire modifier excepting when firing from a building. Maximum visibility is 65 cm. During close combat a roll of "1" indicates a blunder combat. No fires may be started

### 6.4.3 Arrival times:

#### French:

- V , XI , 2C/IIIC starting at 10.30 hours deployed
- 8/III and 23/IIIC at 14.30 in march column at D1 road
- 9/III, 10/III, 11/III and 39/III at 17.00 in march column at D1 road
- 4C/IIIC and Fr#6 (II/C) at 18.00 in march column at D1 road

#### Allied:

- L Left Russian Wing deployed at 10.30 hours
- I Prussian Corps deployed at 11.00 in A3–A4 area
- R Right Russian Wing in march column at 18.00 in A2–A3 area

**6.4.4 Options:** The French III Corps was historically not fully employed due to delays caused by bad weather and traffic jams. To allow for it, 9/III, 10/III, 11/III and 39/III can not attempt enter before 17,00 hours. After, each division must dice separately in that and each subsequent turn. The values must be equal or less than: 4 (for 17,00 h.), 5 (for 17,30 h.), 6 (for 18,00 h. and subsequent turns)

**6.4.5.** Both armies have seven free rolls. The French have the initiative.

## 6.5 Victory Conditions

The buildings of Eichholtz and Nieder-Crayn are worth 120/192 victory points each for Allied/French. The other buildings and the three bridges are worth 60/96 victory points for Allied/French.

## 6.6 Historical Katzbach

The rain did much to obscure the opposing forces and MacDonald sent Lauriston and Gerard onto the attack while he attempted to continue his build-up of forces across the Neisse river. Blucher realized the vulnerability of the French forces across the Neisse river and sent his forces in repeated attacks to take the vital bridge at Neider Crayn. Lauriston and Gerard's attacks did well and pushed the Russians all the way back to Hermansdorf but it was the fighting on the other side of the Neisse river that decided the battle. The Prussian and Russian cavalry made repeated charges against the French and with infantry support and were eventually able to break through and rout the French. French losses were heavy as the one bridge made for an easy killing ground. Many Frenchmen drowned in the Neisse trying to escape. This victory won Blucher his title of Prince.

## NOTES

**a** For infantry in square, use the other (OT) modifier if vs. any infantry. For infantry not in square, use the “OT” modifier if vs. any attacking cavalry, and not in a town, entrenched, or with friendly cavalry in the same combat. For attacking cavalry, use the “OT” modifier vs. infantry or artillery not in square and not in a town, entrenched, or with friendly cavalry in the same combat. Use the current modifier in all other combats.

**b** The “RSP (Response) number is used for cavalry recalls (with a “-1” modifier for Austrian HC and LC , a “-4” for british (not KGL) and “-2” for all other cavalry), rallying and for square (with a “+1” for Prussian GD, GN and LN in line formation until 1809, “+2” for Austrian GN and LN in column formation after 1807, and “+1” for all other infantry in column formation. General RSP modifiers are: “-1” if Poor, “+1” if Good and “+2” if Excellent. The disorder modifier is “-3”. A modified RSP number is also the withdrawal modifier.

**c ROUTS** Infantry and gunners 46 cm, cavalry and limbered artillery 69 cm. Routing units always in column or limbered

**d** Subtract for the “LIN or UNL” speed. Also the cost to “about face”. Cannot used while within 3 cm of an enemy unit

**e** Eliminated on “1-3” when alone or attached to a routed, dispersed or eliminated unit

**f** Use the current formation modifier

**g** May evade infantry (horse artillery limbers, if not so when contacted) unless disordered or routed. Only reacting cavalry may evade enemy cavalry

**h** May dismount

**i** Same as when mounted

**j** Can all-out attack Number = army morale value

**k** Two fire hits from one shoot or One combat hit are required to eliminate an artillery, pack train or wagon crew figure (also disorders the unit). Any artillery, pack train or wagon is eliminated with two eliminated crew

**l** Use a “-1” modifier for artillery representing only 4-5 guns. Gunners without their gun lose their ability to fire

**m** Per 4 cavalry or infantry bases or per 1 artillery, pack train or wagon base. 1 point less for batteries of only 4-5 guns

**n** 10-12 gun batteries are represented by two separate artillery bases

**p** May not initiate combats

**q** May initiate combats only if attached to infantry or cavalry

**s** Is skirmish infantry
